

ADOS

Clinical Training Workshop

Marriott Hotel, Lake Mary, Florida

at the
17th Annual CARD Conference

8:30am—5:00pm
January 28-29, 2010

Description:

The Autism Diagnostic Observation Schedule (ADOS) has become the standard instrument for assessing autism and PDD across age, developmental level, and language skills. Providing Autism Links & Supports (PALS) is offering a 2-day workshop as part of the Statewide Annual CARD conference. Participants will learn how to use the ADOS in clinical practice to assess and diagnose autism. Expert Clinical Trainer Dr. Catherine Rice will demonstrate administration and scoring, as well as operationalizing and clarifying DSM-IV/ICD-10 diagnostic criteria for Pervasive Developmental Disorders (also known as Autism Spectrum Disorders). A combination of lecture, live demonstration, video presentation and discussion will allow participants to practice scoring while observing the instructor administer the ADOS. Participants must bring an ADOS Manual to the workshop or purchase one on this form. This 2-day workshop is a precursor to the 17th Annual Statewide CARD conference. CEUs will be available for psychologists and SLPs only, and will be at additional charge.

Clinical Trainer: Catherine Rice, Ph.D.

Dr. Rice is a behavioral scientist at the National Center on Birth Defects and Developmental Disabilities at the Centers for Disease Control and Prevention (CDC). She also serves as a Diagnostic Associate at the Emory Autism Center and is an approved professional trainer on the diagnosis and assessment of people with an Autism Spectrum Disorder (ASD) through Emory and Western Psychological Services. Dr. Rice is on the Board of the Greater Atlanta Chapter of the Autism Society of America. She received her undergraduate degree in Psychology from Emory University and her doctorate in Developmental Psychology from Boston College. Dr. Rice has worked in teaching, research, diagnosis, and consultation related to autism and other developmental disabilities for over 13 years. Her current work at CDC involves tracking the rates of ASDs in Atlanta and works with state partners to establish ongoing monitoring systems for ASDs around the United States.
