

## Project Lifesaver Contact List for CARD-USF Catchment Area

From the Project Lifesaver International website:

“Project Lifesaver relies on proven radio technology and a specially trained search and rescue team. Clients that are enrolled in the Project Lifesaver program wear a personalized wristband that emits a tracking signal. When caregivers notify the local Project Lifesaver agency that the person is missing, a search and rescue team responds to the wanders area and starts searching with the mobile locator tracking system. Search times have been reduced from hours and days to minutes. In over 1,500 searches, there have been no reported serious injuries or deaths. Recovery times average less than 30 minutes.”
