THE HELP YOU NEED, WHEN YOU NEED IT MOST

Caring for someone with a cognitive condition who wanders is a considerable responsibility. You keep a close eye on them and know exactly where they are most of the time, but there's always that terrifying possibility that they may wander and become lost. SafetyNet™ Tracking Systems® helps public safety agencies quickly find and bring them home, providing you with additional protection and peace of mind in your mission to keep them safe.

HOW IT WORKS

- They would wear a SafetyNet™ Bracelet at all times. The Bracelet features a Radio Frequency transmitter that emits a continuous signal.
- When you realize your loved one is missing, you contact authorities **immediately**.
- Trained search and rescue teams track the signal being emitted from the SafetyNet Bracelet.
- Once public safety officers locate the missing person, they can return him or her home safely.

PROVEN TECHNOLOGY

Radio Frequency technology can work in densely wooded areas, buildings and shallow water, even when GPS and cellular technology cannot.

WE WORK DIRECTLY WITH LAW ENFORCEMENT

Law enforcement and other public safety agencies are trained, certified and equipped with SafetyNet Search and Rescue Receivers. In addition, personnel are trained on how to effectively communicate with people who have cognitive conditions.

COMPREHENSIVE SUPPORT SYSTEMS

The SafetyNet service includes a secure database of key client information to assist in search and rescue operations as well as 24/7 customer support.

SUCCESS STORIES

Since 2010, there have been over 500 successful searches for individuals on the SafetyNet Program.
