Taking My Meds

Healthy Multi-Vitamins

Cherry Cough Syrup

RX

Pills

Spoon
Kids take medications for lots of different reasons.
They might take them because the medications make them feel or breathe better.
Some kids take medications to help them learn better.

Take only as directed.

Take 1 capsule twice a day.
Other kids take medications to help them sleep better.

Night Time
Cold & Sinus Relief

Take 1 tablet at bedtime
Some medications are taken as pills.
Other medications are liquid.

You can take them with an oral syringe that comes with your medicine or ask your pharmacist for one.

Take 1 teaspoon twice a day
Some medications that help kids breathe are taken with an inhaler.
Sometimes a doctor or nurse has to give medication as a shot.

This will keep you from getting sick!
Some medications have to be taken with water or food.
Some medications have to be taken at the same time every day.

Directions:
Take 3 capsules every 8 hours.
All medications should be taken only as directed on the label.

Do not take this medication with milk or dairy products.
Only take medication when your doctor says you need it.

Only take this medication when you can’t sleep!

Dr. I. M. Fine

Prescription for Medication

**Take 3 tablets each day until gone**
Your medication is only for you!

Don’t give it to someone else
and don’t take any that isn’t yours.

Your name and birth date will be on the label!

The pharmacist writes your name and birthday here
Medication isn’t food.

Don’t take it because you are hungry or want to taste it.

Have a snack instead!
Tell someone if you think a medication is making you feel sick or tired.

This medication makes me feel very sleepy!

Take 1 teaspoon before bedtime
Here are some things I can do to make taking my meds a little easier.

Just put them in the back of my mouth and take a big drink of water – don’t chew!

Take them with a spoonful of something tasty like applesauce or ice cream

Rinse my mouth with juice after swallowing the medication.
